

El título: ¿cómo hacer que  
interese al lector?

*Dr. Federico Ferraris*

# TITULO

- *“Las primeras impresiones son impresiones fuertes; por ello, el título debería ser bien estudiado y dar, en la medida en que lo permitan sus límites, una indicación clara y concisa de lo que vendrá luego”.*

*Clifford Allbutt*

# TITULO

## IV.A.2. Portada

La portada debe incluir la siguiente información:

1. El título del artículo. Los títulos concisos son más fáciles de leer que los largos o intrincados. Sin embargo, si los títulos son demasiado cortos pueden no ofrecer información importante, como el diseño del estudio (que es especialmente importante para identificar los ensayos controlados aleatorizados). Los autores deberían incluir en el título toda la información para que la recuperación electrónica del artículo sea a la vez sensible y específica.

Comité Internacional de Editores de Revistas Médicas (ICMJE)

# TITULO

- Tener presente:
  - Todos leerán el título; tal vez alguno el artículo entero.

# ¿Qué es un buen título?

- El menor número posible de palabras que describen adecuadamente el contenido de un artículo.

*10-12 palabras*

# Número de palabras

**Estudio correlacional entre el índice de masa corporal, perímetro abdominal y volumen de la glándula prostática en pacientes con sintomatología obstructiva urinaria por crecimiento prostático**

# Número de palabras

## ARTÍCULO ORIGINAL

Estudio de seguimiento de pacientes con síntomas del tracto urinario bajo; sugestivos de hiperplasia prostática benigna, tratados con alfuzosina 10 mg una vez al día por seis meses en 

# Número de palabras

**Nanotechnology combination therapy for Renal Cell Carcinoma: Gold Nanorods bound with tyrosine kinase inhibitor produce synergistic treatment response when combined with laser thermal ablation in a Renal Cell Carcinoma animal model**

*BR Lee, C Callaghan, SH Mandava, D Peralta,  
M Bouljihad, SD Dash, JL Liu, MT Tarr, MM Maddox, WL Lai  
United States*

# Número de palabras

- Prevención cuaternaria.
- Leiomiosarcoma renal.
- Experiencia en el tratamiento del cáncer vesical.

# Número de palabras

[Finasteride and Bladder Cancer.](#)

20. La Vecchia C.

*Eur Urol.* 2015 Sep 10. pii: S0302-2838(15)00858-1. doi: 10.1016/j.eururo.2015.09.001. [Epub ahead of print] No abstract available.

PMID: 26364552

# Números Romanos

The screenshot shows the Foxit Reader interface with the document 'Campbell Urology 10.pdf' open. The main text area displays a paragraph with a highlighted section. The highlighted text reads: **should enhance less than 10 HU, is diagnostic for angio-myolipoma. A hyperdense cyst shows no change in density between the postcontrast and delayed-phase images (Fig. 4-54).**

The surrounding text includes: **an attenuation Hounsfield value is based a value of e value of** and **with abdominal imaging. The bias was first become the ers the advan- y to diagnose e abdominal that may not u in the distal f some indi- be detected**. The text continues: **the workup of ging between % and 100% ureter can**.

The interface includes a top menu bar (FILE, HOME, COMMENT, VIEW, FORM, PROTECT, SHARE, HELP), a toolbar with various tools (Hand, Select, Annotation, Snapshot, Clipboard, Fit Page, Typewriter, Note, Highlight, Strikethrough, Underline, From File, From Scanner, Blank, From Clipboard, PDF Sign, Link, Bookmark, File Attachment, Image Annotation, Audio & Video), and a sidebar with a 'Pages' view showing thumbnails of pages 146 through 150. A status bar at the bottom indicates page 150 of 3831 and a zoom level of 200%.
